

# Series / Parallel Wiring Worksheet

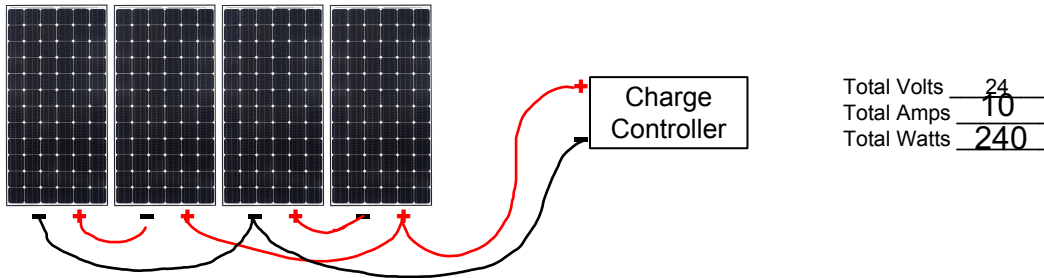

1. Connect the modules in series. Modules specifications are 12V and 4A

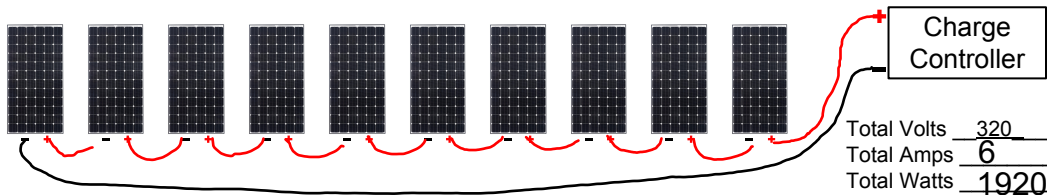

2. Connect the modules in parallel. Modules specifications are 12V and 4A

3. Connect the modules in series-parallel. Modules specifications are 12V and 5A. System voltage will be 24V

4. Connect these modules for an array voltage of 320V. Each module is rated at 32V and 6A.

5. The array needs to be wired at 12V. Each module is rated at 12V, 6A.
